Calls Per Second (CPS) — Initiation Rate

What is CPS? CPS (Calls Per Second) controls how many outbound calls Twilio *initiates* every second. This is separate from how many calls are active at once. A higher CPS means all calls are dialled out faster.

This campaign is provisioned at **10 CPS** — meaning Twilio initiates **10 new calls every second**.

Example	Total Calls	CPS	Time to Initiate All Calls
Illustration	1,000 calls	10 CPS	$1,000 \div 10 = 100$ seconds
This Campaign	4,000 calls	10 CPS	$4,000 \div 10 = 400$ seconds (~6 min 40 sec)

CPS Cost: Provisioning 10 CPS on Twilio incurs a monthly fee of **\$540.00**, included in the total below.
